

SCRIPT CTF OSINT

→INSIDER 1

The first thing which came to my mind after reading the question was the challenge “authors” and discord “admins” So I started checking the discord accounts of all the individuals in scriptCTF server Where I found out the following account

Flag was displayed on the noobmaster_1337's account

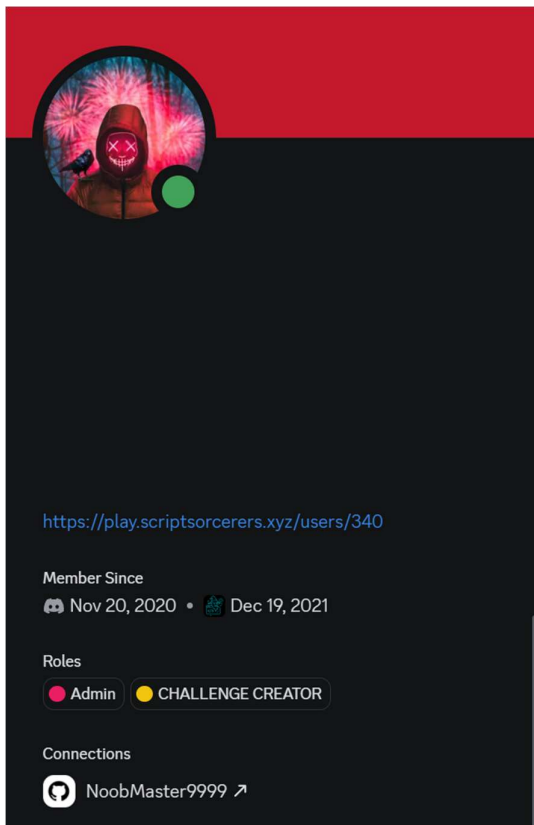

→THE INSIDER 2

So, we found out the insider now its time to find his GitHub account

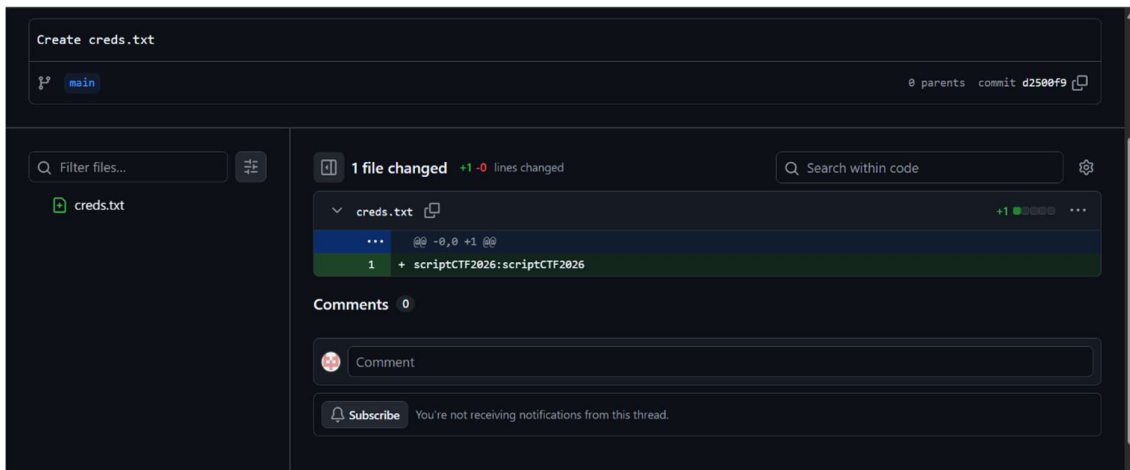

Let's get back to the search.....

Now I know who the insider is!! My complete focus will be on his account so I decided to read his full bio on his discord account where I found 2 very important clues and keys.

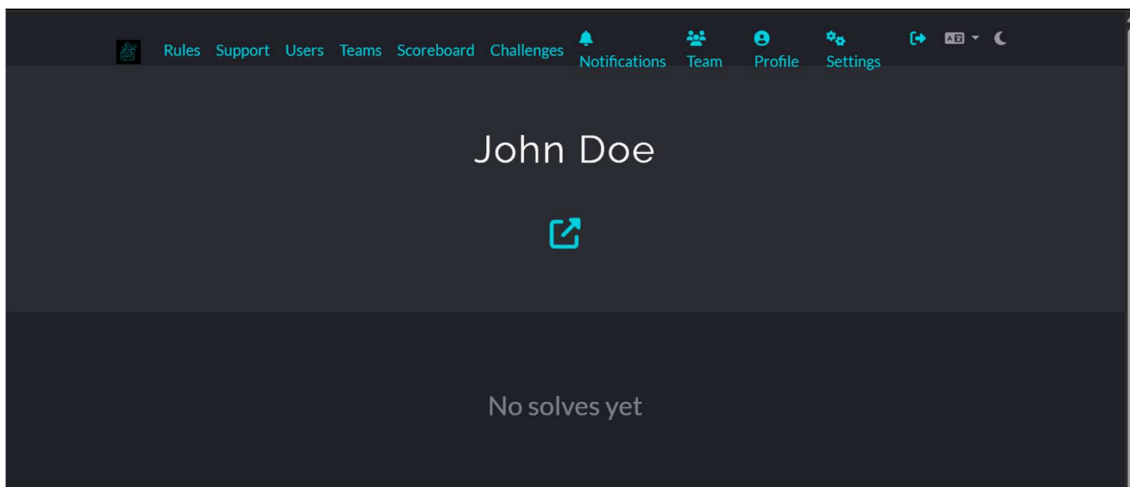

NOTE:- <https://play.scriptsorcerers.xyz/users/340> keep eye on this link.

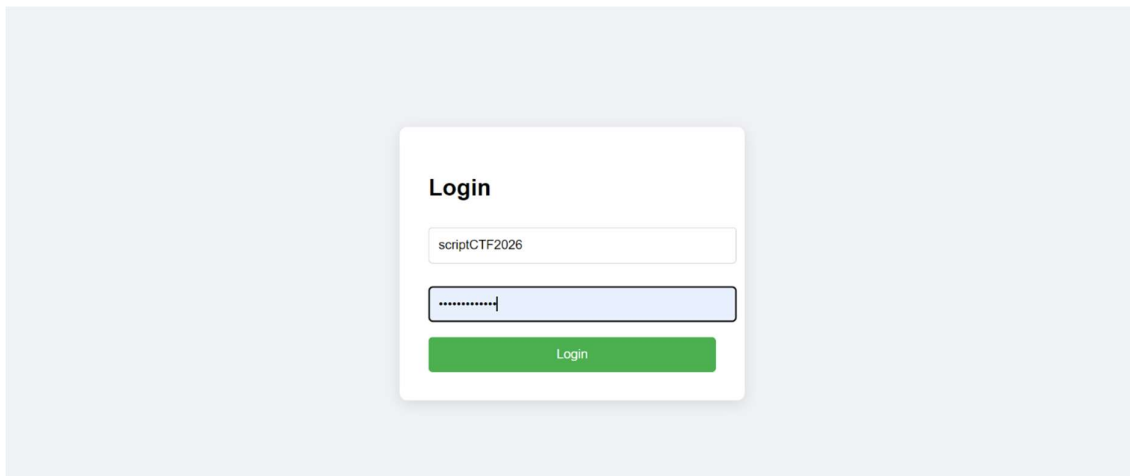

Then I decided to find the leak message from discord and I found a recent commit.

Above creds.txt contents ID and password to the link which we noted earlier.

proceed by clicking on the link where you will get something like this.

We are almost there.....

.
. .
.

Let me grab my coffee first umm here we go again

scriptCTF{scriptCTF_2026_leaked?!!}

GOOD JOB....

Flag 1:-

scriptCTF{1ts_0bv10u5ly_j0hn_d03_aka_n00bm4573r}

Flag 2:-

scriptCTF{scriptCTF_2026_leaked?!!}

NoobMaster

It's a tradition at this point. Continue where you left off...

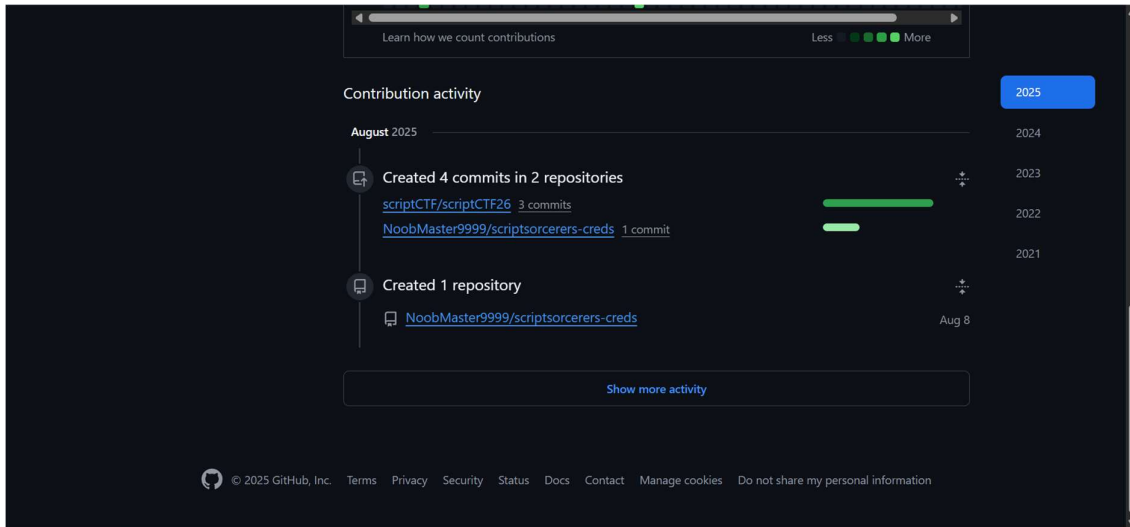

1/10 attempts

Flag

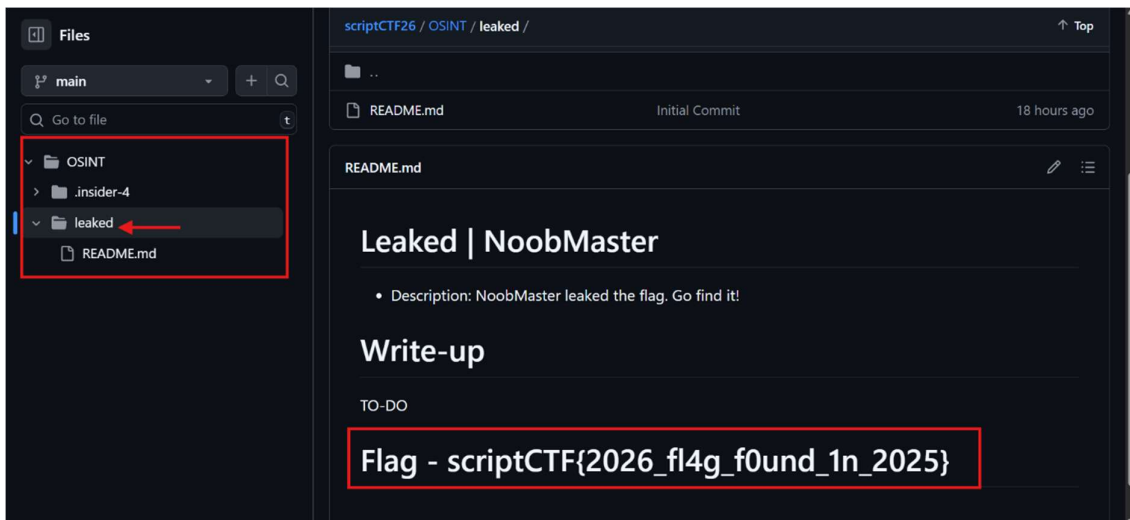

Submit

So, we have a clear hint in the challenge...

Let's get back to the Github account where we found the cred.txt

See the recent commits where you will find the following message

Great job but the job is not done yet lets move to the last challenge.....

THE INSIDER 4

The Insider 4

485

NoobMaster

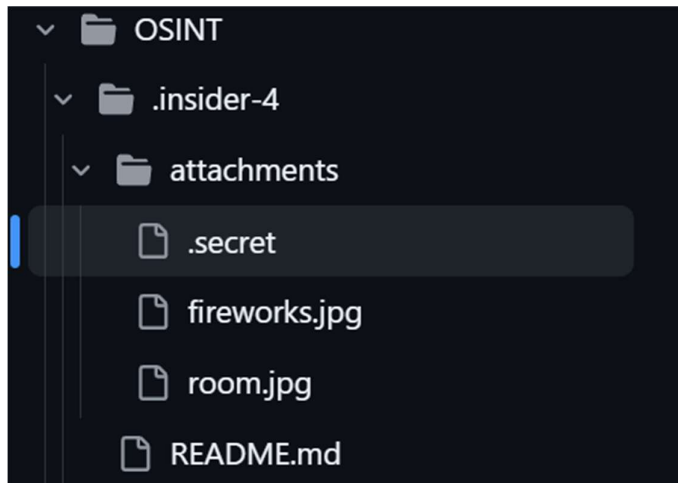

Good luck! Note: max flag limit is 6 for a reason, you should be able to get it in less than that. If not, open a ticket. Flag is case insensitive

6/6 attempts

Let's note some points here

→ max limit of the flag is "6 FOR A REASON"

Sherlock mode activated

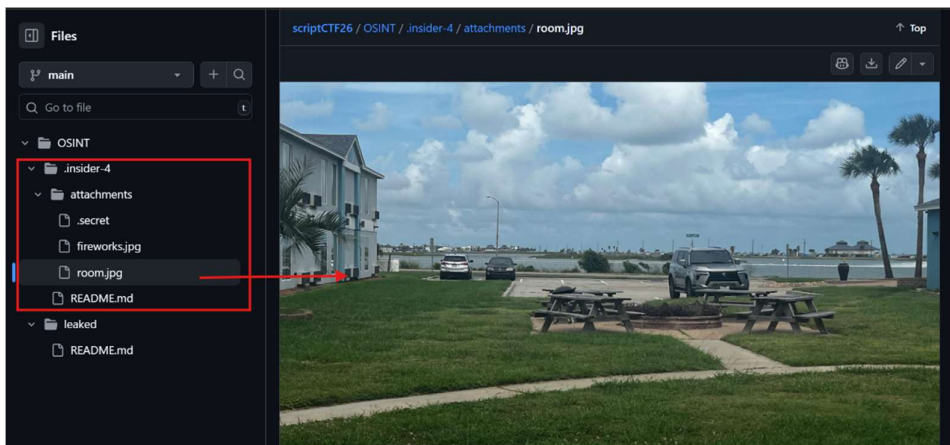

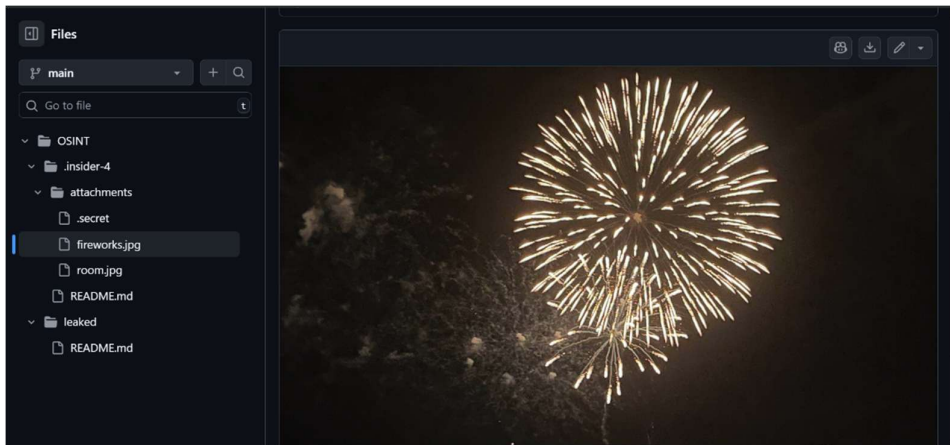

Lets follow the flow now

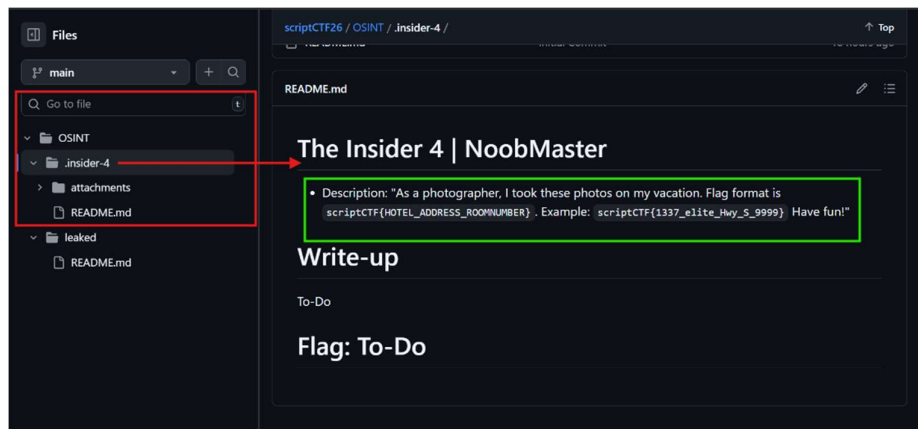

1) Secret message

as a photographer, i add comments/descriptions to my images

2) Attachments

3) flag format

Let's start the search

Now we know he is a photographer and likes to add comments and description

I used exiftool to find the metadata and I found a very important clue from the picture...

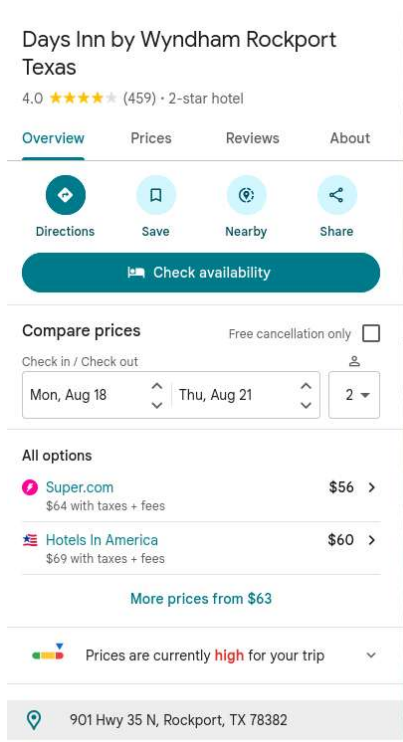

```
Green Tone Reproduction Curve : (Binary data 52 bytes; use -b option to extract)
Comment : Great fireworks! Thanks to the Wendell family for organizing these!
```

So its an event organized by Wendell family lets try to find where the event takes place and after digging deeper on brave I got the name of location where the event took place

it was in 925 Lady claire St, Rockport, Tx 78382
now its easier to find the hotel

Found the exact building with the help of sign and the hotel name was

We got the perfect address. time to find the room number.....

So he was sitting somewhere here when he got that room picture on the left side of the building.

From the back side view of hotel, it was clearly visible to see the room number but we were not sure about this so we decided to call the hotel staff which is part of social engineering.

We found the map of hotel

Perfect now get back to the note we wrote at the start.

It says we have 6 attempts for a reason and the number of rooms on the first floor are 6

Also, we know he took the picture from left side of his room

So, it's between 112 or 111

After trying both of them we got the correct answer.

```
scriptCTF{901_Hwy_35_N_111}
```
